

Approval

This is to certify that the Graduation Project titled: **“Comparative Performance of Random Forest and Conditional Random Fields Models for Named Entity Recognition Using the CoNLL-2003 Dataset”** has been carried out under my supervision, thoroughly reviewed, and meets the academic standards required as part as partial fulfillment of the requirements for the award of the Bachelor of Science (Hons) in Computer Science.

The dissertation presents a comparative performance analysis of the Random Forest and Conditional Random Fields models on the CoNLL-2003 dataset for Named Entity Recognition (NER). It reflects the student's grasp of model design, experimentation, optimization, and evaluation in the domain of machine learning and natural language processing.
